

CLEANING CODES AND TIPS:

We know accidents happen. When it is time to clean your sleep sofa, please contact your retailer for the cleaning codes of your respective fabric.

S: Spot clean with mild, water-free, dry-cleaning solvents only — do not use water and do not soak the spill or stain. Instead, pre-test a small, out-of-sight area of the fabric before tackling the entire stain or spill. If your sofa is covered with a pile fabric, use a non-metal, stiff-bristle brush like a toothbrush to clean the stain or spill more thoroughly. For stains that cover the entire sofa, call a professional cleaning service rather than attempt to clean it yourself.

W: Spot clean the stain or spill using only a water-based shampoo or-foam upholstery cleaner. Pre-test a small, out-of-sight area of the fabric first to make sure it won't discolor the fabric. For stains that cover the entire sofa, call a professional cleaning service rather than attempt to clean it yourself.

WS: Spot clean the stain or spill using only an upholstery shampoo, a mild foaming detergent, or a mild, oil-based dry-cleaning solvent like Energine, Carbona, or Renuzit. Be sure to pre-test a small, out-of-sight area of the fabric first.

X: Fabrics with this code should be cleaned only by vacuuming or lightly brushing the stain or spill with a non-metal, stiff-bristle brush, like a toothbrush. Do not use any water or solvent-based cleaners or you risk staining, shrinking or distorting the fabric.
